SIRIM CERTIFIED TO PEFC ANNEX 4:2005 CERT NO: FDCC 044

SOLID HARDWOOD FLOORING

WHY IS IT GREEN?

ME Floor's flooring products are fabricated from wood material harvested from well managed forests that are certified under the Program for the Endorsement of Forest Certification Scheme (PEFC), Malaysia Timber Certification Council (MTCC) and Forest Stewardship Council (FSC). There are no adhesives used in the production process, hence solid wood flooring does not emit harmful chemicals such as formaldehyde and other volatile organic compounds (VOCs) during its service life. In addition, we use non-toxic and low VOCs acrylic lacquer and oil finishes as the surface protective coating for the solid hardwood flooring.

PRODUCT FEATURES

ME Floor's solid hardwood flooring offers an ideal backdrop for almost any decorating style, and is renowned for their warmth and elegance. Our solid hardwood flooring can be laid pre-finished or un-finished thus enabling the boards to be re-sanded and re-stained if required to look like new without the need to replace the flooring. When maintained properly, solid hardwood floors can last more than 25 years and the beauty of the wood often increases with age. Our solid hardwood floors are available in various wood species from local certified tropical forests, in various colours and surface finishing such as carbonized and brushed.

PRODUCT CERTIFICATION

- PEFC (Program for the Endorsement of Forests Certification Scheme)
- FSC (Forest Stewardship Council)

ENGINEERED HARDWOOD FLOORING

WHY IS IT GREEN?

ME Floor's flooring products are fabricated from wood material harvested from well managed forests that are certified under the Program for the Endorsement of Forest Certification Scheme (PEFC), Malaysia Timber Certification Council (MTCC) and Forest Stewardship Council (FSC). In addition, fast growing renewable materials such as bamboo are also being utilised as raw materials to produce our timber flooring. ME Floor's engineered hardwood flooring uses non-toxic and low volatile organic compound (VOCs) lacquer and oil finishes as the surface protective coating for the solid and engineered hardwood flooring. For engineered hardwood flooring, the adhesives used in the lamination process surpass the European E1 standard for the formaldehyde emission testing.

PRODUCT FEATURES

ME Floor's engineered hardwood flooring has its own special characteristics to ensure satisfaction in terms of performance. Our engineered hardwood flooring is fabricated with a patented core layer known as VERSA CORE. The incorporation of VERSA CORE layer into the engineered wood flooring gives floor boards extra dimensional stability thus minimising moisture associated problems such as warping. ME Floor hardwood flooring products are available in various wood species, colours, patterns and surface finishing such as sandblasted, handscrapped and wire brushed.

PRODUCT CERTIFICATION & COMPLIANCE

- PEFC (Program for the Endorsement of Forests Certification Scheme)
- FSC (Forest Stewardship Council)

1 Strip :

Size : 12mm (Thickness) x 90mm (Width) x 300-1200mm (Random Length) /
14mm (Thickness) x 138-148mm (Width) x 600-1800mm (Random Length)

Size : 12mm (Thickness) x 120mm (Width) x 600-1200mm (Random Length) /
14mm (Thickness) x 180-189mm (Width) x 600-2200mm (Random Length)

2 Strip :

Size : 14mm (Thickness) x 180mm (Width) x 600-1800mm (Random Length)

3 Strip :

Size : 14mm (Thickness) x 189-195mm (Width) x 600-2200mm (Random Length)

Line Bamboo Carbonized Classic
14mm x 180mm x 2200mm

Line Bamboo Natural
14mm x 180mm x 2200mm

ECO FRIENDLY

Bamboo flooring is one of the hardest natural materials available for flooring and is an excellent alternative to hard wood flooring. Bamboo has a higher fibre rating than any hard wood, which gives it exceptional hard wearing qualities. This natural bamboo flooring solution is available in few different styles, which will compliment any interior design. From ultra contemporary chic through to a more traditional classic style, natural bamboo flooring will give you a truly unique look. Because bamboo is a rapid growing grass and not wood, it can be harvested every 3-5 years, unlike 15-25 years for most wood. This makes bamboo a very environmentally friendly product for flooring.

RAINDROP SERIES

Black product was comes from small strips recovery item then it could claim this product was from small size or down fall sizes that collected by farmer. This small size usually was comes from logs from US when they manufacturer do the veneer process and we buy this logs end from them (which only Suitable for light up the heater (firewood) and we made and turn into flooring for more value using.

So basically rather than turn the small size of lumber to firewood and create more CO2 , then we create better future and valuable product by convert it to Flooring which is useful to keep the humidity and the temperature inside the house always stable.

This farmer and supplier use manual to handle this small logs end and small lumber so very minimum use heavy vehicle

ELITE FLOOR, newest products by ME Floor, surface layer from a full plank of hardwood with 250mm or 300mm in width and various lengths from 1800mm to 3000mm. The total thickness of the flooring is 19mm with the construction of 5mm thick hardwood surface layer, 9mm cross-laid interconnected solid hardwood bar middle layer and 5mm finger-joint hardwood strips bottom layer. The constructions for the middle and bottom layer of the flooring is to encourage fully utilized the recovery from the hardwood processing in the mean time giving better performance for the flooring. The middle and bottom layer used the same species or similar density of wood as surface layer do instead of light hardwood from plantation or softwood helps to enhance balancing of hardwood planks and reduce possibility of twisting and bowing. It also helps to improve thermo- and sound insulating properties of floors. Oiled finishing Monster Floor designed to highlight the natural richness and deep grain texture of the wood and feels warm and smooth under your feet, does not show dents and scratches as much as other finishes do.

Solid & Sport Hardwood Flooring

Maple

Solid wood flooring is one of the most popular because of its natural wood grain and color, which compliments other building material and with many styles of furniture. Solid wood flooring have feature of elasticity and noise dampening effect. In addition, the quality of its natural material exudes a sense of comfort. Solid wood flooring is very long lasting, can be refinished many times compare with other timber flooring.
