What's different with our system?

Structural Integrity: Solid Wood Frame System

Solid Wood
Construction

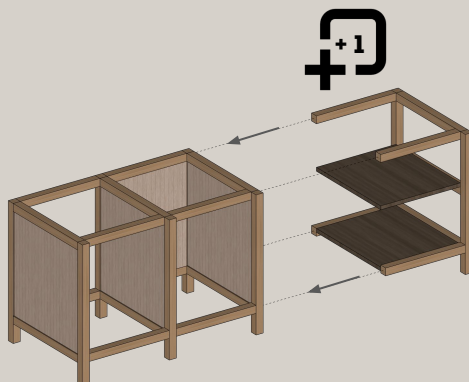

Standard Sheet Panel
Construction

vs

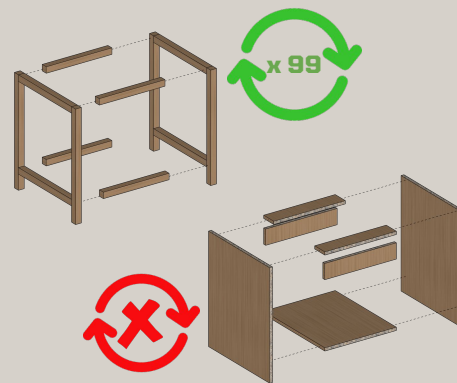

Engineered from solid hardwood — not weak chipboard or MDF panels — our open-frame joinery delivers unmatched strength, durability, and ease of repair. No peeling laminates. No warping. No sagging over time.

Freedom to Adapt: Modular by Design

Each unit is part of a flexible system. Add new modules, reconfigure your layout, or change specific elements without dismantling the whole kitchen.

Future-Proof: Dismantle, Rebuild, Reuse

Unlike conventional cabinets that break on removal, Tanggam's joinery can be assembled and disassembled repeatedly. Move homes, upgrade finishes, or swap damaged parts — without waste.

Design, configure & customise your Kitchen layout

Example 1 - Small

Single Wall Layout

- Kitchen Cabinet (x5)
- High Cabinet (x1)

Example 2 - Medium

L-shaped Layout

- Kitchen Cabinet (x8)
- High Cabinet (x2)

Example 2 - Large

Single Wall + Island Layout

- Kitchen Cabinet (x5)
- High Cabinet (x2)
- Island Cabinet (x4)

Custom Design for Archidex 2025

PULAU 01

Pulau 01 is a specialised kitchen island built on the Tanggam system frame — named after the Malay word for “island,” it celebrates the communal and multifunctional role of kitchens in Malaysian culture.

Designed as a freestanding centerpiece, it serves as a compact yet fully featured kitchen unit, adaptable for both indoor and outdoor use — whether in urban apartments, events, or modular/mobile setups.

Its layered surface system allows tailored configurations, including integrated sinks, stovetops, prep zones, tea sets, or serving areas — offering both flexibility and presence in any setting.
